Which changes its temperature more slowly?

- Land
- Air
- Oceans
**KEYWORD:** Thermal Inertia

Oceans hold onto heat longer than the land surface or air.

**KEYWORD:** Thermal Inertia

Oceans hold onto heat longer because rising air temperatures take a lot of time to make their way through the huge thermal mass of the oceans.

**KEYWORD:** Thermal Inertia

Oceans hold onto heat longer because rising air temperatures take a lot of time to make their way through the huge thermal mass of the oceans.
