This graduate program can give you an experience & journey of a lifetime.

Take the opportunity of a lifetime and join in the study of ice sheets located in the cold climates of the arctic regions while making discoveries and working with top scientists and research centers.

CReSIS (Center for Remote Sensing of Ice Sheets) is a center that gives undergraduates and graduates a great opportunity to make a career for themselves in the field of science. For more information log on to: www.cresis.ku.edu.
